SUMMARY

Information Technology graduate with experience in developing web and cross-platform applications. Adept at creating user-friendly solutions for web, mobile, and desktop, including projects built on both traditional and low-code platforms. Eager to grow and excel in a competitive, dynamic, and innovation-driven environment.

SKILLS

- GIT
- HTML
- CSS
- PHP
- DART
- JAVASCRIPT
- FLUTTER
- FLUTTERFLOW
- LARAVEL
- REACTJS
- RESTFUL API
- PHPMYADMIN
- FIREBASE
- MYSQL
- FIGMA
- CANVA
- MS SUITE
- GOOGLE WORKSPACE

EXPERIENCE

On-the-Job Training   **February 2025 - May 2025**
PhilRice – Central Experiment Station

- Contributed on the development of a service request management system for ICT-related issues through web and mobile platforms, using Laravel, Flutter, MySQL, and PHPMYADMIN.

Builders of Information Technology Society (BITS)   **August 2024 - August 2025**
Resident Member

- Gained experience in producing graphics for events, promotions, and organizational activities.
- Contributed on providing fundamentals programming tutorials to lower-year students as part of the organization's outreach and skill-building initiatives.

PROJECTS

BAYANi - Emergency Response App

- Contributed to the emergency response web and mobile application tailored for the City of Muñoz, using Flutter, Firebase, and the OpenStreetMap API.

ICT Maintenance Systems

- Contributed on the development of a service request management system for ICT-related issues through web and mobile platforms, using Laravel, Flutter, MySQL, and PHPMYADMIN.

Blog Management System

- Contributed on the development of a blog content management system initially built with PHP and later transitioned to Laravel for improved structure and scalability, using PHP, Laravel, and MySQL.

GWA & GPA Calculator

- Developed a cross-platform application using Flutter, delivering a single codebase for Web, Android, and Desktop. Deployed the web version via GitHub for public access.

Personal Portfolio Website

- Created a responsive and interactive personal portfolio using React.js to showcase projects, skills, and professional background.

CIPHER - E-commerce App

- Contributed on the development of a mobile e-commerce application created for Central Luzon State University (CLSU) using FlutterFlow and Firebase.

FireFly - Movie Booking System
- Contributed on the development of a web-based movie booking platform that allows users to browse movies, select schedules, and book tickets online, developed using HTML, CSS, JavaScript, PHP, and MySQL.

GRILLEDEC - Restaurant Website
- Contributed on the development of a static website for a restaurant, showcasing its menu and services using HTML, CSS, and JavaScript.

EDUCATION

Bachelor of Science in Information Technology   **August 2021- July 2025**
Central Luzon State University
GPA: 1.59 (Cum Laude)
- Coursework included software engineering, database management, process design, and project management.

Humanities and Social Sciences   **August 2019- May 2021**
Wesleyan University-Philippines - Aurora Campus

ADDITIONAL INFORMATION

- **Languages:** English, Tagalog
- **Certifications:** Specialization: Google Workspace Issued by Google, 2024
